Course format

Working language :	English
Volume of contact hours :	27 h
Workload to be expected by the student :	108 h

Course track

Track : Attendance

"Attendance" track :

Attendance at lecture / tutorial classes and intermediate / final exams is mandatory. As evaluation of in class work constitutes an essential element of grading, any absence will be penalized and is taken into account for grading purposes (see academic rules and regulations).

"Autonomous" track :

Attendance at intermediate / final exams is mandatory, but students are free to attend lecture / tutorial classes.

For all Master programs and all other programs realized in the form of dual internships (apprentissage), attendance at lecture / tutorial classes and intermediate / final exams is entirely mandatory. Therefore, only the "Attendance" track can be selected.

Contribution of the course to the educational objectives of the programme

How the course contributes to the programme :

Description

The management of innovation is one of the crucial and challenging aspects of modern organisations. By creating value, innovation is a fundamental factor of competitiveness. Innovation being undoubtedly uncertain and risky, it makes very often difficult for new innovative technologies to be translated into successful products and services. Given this, it is of high importance for students to understand the strategies, tools and techniques for managing innovation, which often requires a different set of management knowledge and skills from those used in everyday business administration.

This course aims to equip management students with an understanding of the main issues in innovation management. For this purpose, a number of methods and approaches based on real-world examples and experiences will be presented.

Educational organisation
